

MAGNETISM FOR KIDS

What are magnets used for?

Without magnets, thousands of everyday items that we have come to take for granted would never have been possible. Without magnets there would be no electric motors, no loudspeakers, no smartphones, fewer medical advancements, no wind turbines and you wouldn't be reading these words on screen as there would be no computer hard drives. You really do owe a lot to magnets!

Can you identify these objects from the pictures below? Here's a clue, they all use magnets!
